-- As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

U.S. DEPARTMENT OF AGRICULTURE, FOREIGN AGRICULTURE SERVICE

EXPORT SALES REPORT

Comments on release of January 22, 1976 (based on reports from exporters during the week ending January 11, unless otherwise noted):

Wheat: The apparent export commitment (cumulative exports plus outstanding sales) for FY 1975/76 rose by 305,500 metric tons (MT), the lowest weekly increase this marketing year. The largest increases in commitments were to Peru (127,000 MT) and the Soviet Union (161,900 MT). The new sales to Peru bring the total commitments to that country this marketing year to 526,200 MT, compared with commitments of 365,000 MT for the comparable period last year. The increased commitments to the Soviet Union of 161,800 MT reflect transfers mostly from optional origin.

Feedgrains: The apparent export commitment for corn in 1975/76 increased by 596,100 MT, largely due to new sales to the European Community, Eastern Europe, Japan, and Peru. New sales to Poland (83,200 MT) and East Germany (80,600 MT) accounted for most of the increase in commitments to Eastern Europe, which for the region now total 2.9 million MT for the year and 292,000 MT ahead of the comparable period a year ago. Total commitments to Japan, which accounted for 232,700 MT of the past week's increases, now stand at 2.7 million MT for the 1975/76 marketing year and 4.1 million MT below the 6.8 million MT committed as of this date a year ago for 1975/76 shipment. In 1974/75, however, reports of a poor U.S. corn harvest had precipitated abnormally large early-season forward purchases by the Japanese, at least 1.2 million MT of which were subsequently cancelled since eventual exports totaled only 5.6 million MT. The increase of 143,800 MT in commitments to the U.S.S.R. reflects transfers from optional origin rather than new sales.

Since January 11, corn sales to East Germany totaling 100,000 MT were reported under the daily reporting system for April 1976 delivery.

Rice: The apparent export commitment for 1975/76 increased by 47,900 MT. Over two-fifths of this increase was accounted for by a sale to Iran. Commitments to unknown destinations increased by 11,900 MT, much of which is believed to be for shipment to the Soviet Union.

Soybeans: The apparent export commitment for 1975/76 increased 174,500 MT, primarily reflecting increased commitments to the EC, Spain, Taiwan, and Canada. Commitments to unknown destinations decreased 32,700 MT. Exports during the week totaled 449,000 MT, the largest weekly volume shipped since mid-November. The major takers were the EC (307,400 MT), Spain (71,600 MT), Japan (28,900 MT), Norway (21,300 MT), and Taiwan (16,800 MT).

Soybean Oilcake and Meal: The apparent export commitment declined 45,900 MT, primarily reflecting a reduction in commitments to the

Netherlands and unknown destinations. Exports during the week totaled 91,300 MT, which was about the same volume shipped as the previous week. Major takers were the EC (59,100 MT), Poland (10,500 MT), Czechoslovakia (10,000 MT), and Canada (6,100 MT).

Cottonseed Oil: Exports during the week totaled 14,300 MT, the largest weekly volume shipped so far in 1975/76. The increase primarily reflects 12,000 MT exported to Egypt, to which commitments were increased 8,000 MT.

Cotton: The apparent export commitment in 1975/76 for Upland cotton increased by 35,000 running bales, mostly on the basis of new sales of cotton under 1 inch staple to Japan and the Republic of China (Taiwan).

A number of factors contributed to a continued strength in the market. These included the removal or reduction in early January of export incentives by Brazil, Colombia, and Turkey. Cotton prices in Europe rose 200 points during the week and by January 15 they had increased another 130 points.

Daily Reporting of Export Sales - Summary of Activity
July 1--December 31, 1975

The daily reporting of large export sales of certain agricultural commodities was initiated in September of 1974. After several modifications, the procedure in effect since March 6, 1975 was developed. Daily reporting--an adjunct to weekly export sales reporting--serves as an "early warning" system.

Under the provisions of Notice to Exporters No. 1, Revision 2, dated March 6, 1975, export sales of wheat, corn, grain sorghum, barley, oats, soybeans or soybean meal in quantities of 100,000 metric tons or more in any one day or totalling 200,000 metric tons or more in any one week (Monday to Sunday) to a single destination (known or unknown) must be reported by exporters by telephone no later than 3:00 P.M. (Eastern Time) on the next business day following the transaction. The information to be reported includes quantity, destination, delivery period and marketing year, contract number, date of export sale and whether or not the sale is optional origin. This information is to be reported to the Export Sales Division, (202)447-3273. Modifications (such as changes in quantity, destination, marketing year, etc.) in export sales previously reported under the daily system are also to be reported.

During the 6-month period from July 1 to December 31, 1975, a total of 17.9 million metric tons in export sales of grains and soybeans were reported through the daily reporting system. Sales of grains to the USSR and Eastern Europe represented the majority of sales reported. Other countries were reported as destinations for lesser quantities of grains and soybeans. The following table summarizes daily reporting activity during the July 1 through December 31, 1975 period.
